

# MASTER'S DEGREE

## SECONDARY SCHOOL TEACHING AND TRAINING PROFESSIONS

Applied Arts program

Université de Montpellier

## INTRODUCTION

The MEEF (Professions in Teaching, Education and Training) Master's degree is a national qualification designed to prepare students for professions in education.

This program is designed to train arts and applied arts education professionals, teaching a general and/or professional subject at a French professional or technology high school (CAPLP or CAPET).

## OBJECTIVES

It is designed to provide professional skills required by all secondary school teachers, as well as more specific skills linked to teaching in French professional and technical high schools within the framework of applied arts and art education programs.

The relationship with the professional domain, the status of publics, and the strong presence in these unusual professions gives it a unique identity.

The first year of the master's degree focuses on acquiring disciplinary and multidisciplinary knowledge and professional skills. During the first year of the master's degree, students attend recruitment exams: written exams in April and orals in June/July.

The second year of the master's degree involves a placement for students that have passed the exam and hold the M1 (Year 1 of a 2-year master's degree). Students divide their time between classes at the ESPE and an internship teaching classes at a school or institute.

## ENTRY REQUIREMENTS

- **Year 1 of the master's degree: applied arts portfolio**
- **Year 2 of the master's degree: holders of an M1 in the specialization**  
**With an application, cover letter and professional project, after recommendation from the teaching committee, for students who have not completed the first year.**

## SKILLS AND EXPERTISES

The MEEF (Professions in Teaching, Education and Training) secondary school master's degree is a balanced combination of the following five course elements:

- Disciplinary knowledge
- Didactic knowledge
- Professional simulations
- Knowledge of the education system
- Introduction to research

## POSSIBLE CAREER PATHS

### Professions

- Teaching, adult learning, industry.
- Employers: national education system, businesses, etc.

### Continuing studies

The specificity of the course enables students to switch subjects thanks to the skills acquired in the master's degree. There are links with related specializations provided by master's degrees in applied arts, plastic arts to design and culture professions.
