

VOCATIONAL BACHELOR'S DEGREE

CREATION, DESIGN AND DEVELOPMENT OF TEXTILES AND RELATED PRODUCTS

CFA
ENSUP
LR *
Sud de France

INTRODUCTION

This course, provided in partnership with Lycée Hemingway, is designed to train professionals working in any business using textiles or supply materials, in the fields of clothing and fashion, furnishings, motor vehicles, luggage, buildings, medical and allied health, footwear products, childcare and sports.

The aim is to train professionals who are able to quickly identify, analyse and adapt to the needs and restrictions of a production cycle (from production to release)... Every stage of the production cycle is therefore addressed in a linear fashion in a course which «unites» all of the subjects in a single application project. This «industrial project» makes it possible to tackle the entire product cycle, from inception (finding a need) to commercialization, via the drafting of specifications and technical data sheets, and the sourcing and production of prototypes

OBJECTIVES

This professional degree is designed to:

- Satisfy the significant and growing need for technical and creative executives specializing in the creation, design, development and promotion of textile products and by-products.
- Assess and approve a career plan and prepare students for employment.

COMUE LR-Universités Stock

ENTRY REQUIREMENTS

- **Year 2, bachelor's degree in applied arts and design**
- **BTS (Advanced technician certificate) in design**
- **BTS (Advanced technician certificate) in fashion professions**
- **DMA (Vocational arts diploma)**
- **DNAT (National arts and techniques diploma)**

SKILLS AND EXPERTISES

After the course, graduates will be able to:

- Master the various methods and tools for the creation, planning, development and manufacture of a textile product,
